EXPERIENCE

Front-end Developer Internship

Duurzaamheidsvergelijker.nl and Reisauto.nl
July 2020 - Present

- Implemented Git version control, conceptualized and implemented CI/CD and deployment pipeline;
- Conceptualized, designed and coded a tool to compare car rental agencies on Reisauto.nl, that fetches its contents from a database and filters through them, providing the user with the best options for their needs (JavaScript, PHP, CSS, HTML);
- Implemented a headless CMS for article and LP posting;
- Restructured the website and refactored the old code;
- Implemented several features of the website, some of them from concept to production and other by restructuring the legacy code, for instance, forms, landing pages, etc;
- Collaborated with Product and Marketing Manager for implementation of new features.

Erasmus Student Network
